Civilian Tactical Handgun Training

We'll teach **you** how to win the gunfight!

Handgun Safety Course "...I have been around handguns for years coming from different state and thought I knew how to be safe. I came away from the class with a whole new perspective and now plan to continue on with your program. Thank you!" ~ Joe

"...First, I have to tell you that your safety course definitely beats the others hands down, I would highly recommend it to anyone who needs to get their 3 hour safety course to take this one. I do understand that this course is crammed full of info already but if you somehow could manage it I think it would be useful to elaborate a bit more on the rules and regulations, (i.e. justified use of force scenarios, prohibited places to carry, how to handle traffic stop etc.)" ~ David

Tactical Decision Making Course: "...Took the TDM class Sunday. The instructors are incredible. They know their stuff and are excellent at articulating instructions. Had a blast; learned so much. This class is a must for any handgun owner." ~ Robert

Tactical Firearms Training: "...you guys are awesome! Really, I already recommended your classes to multiple people! I really feel ALL your classes should be mandatory learning for someone to carry that serious a responsibility. This may not sound politically correct, but it's really life or death." ~ Richard

Use of Force: "...It was informative, organized and very, very focused on the responsibilities of ccw. But above that , I was again (and again) reminded of things learned in Civilian Handgun Training: four rules of gun safety, readiness of your firearm, the body's reaction to a threat (tunnel vision, distorted sensory perception), unintended consequences, etc., throughout last night's lecture and videos. What is contained in Article 35 is words on paper – the class was about real life." ~ Kathy

Active Shooter, The Civilian Response: "...thanks to you for last night's class. This is my second and I continue to be impressed by the program and glad for it. Last night, the Sheriff and entire team dealt with a very difficult subject in an effective and informative way. I felt I learned; you could tell everyone did during the Q&A. It gave me assurance also to know such dedicated and expert individuals are on the job here in Orange County, as well." ~ Best, Anthony
